LITTLE COMMANDERS - print and play (4 players; 2-3 players use the same sheets)

PRINT: A4, 100% / "actual size", black and white. Do not scale to fit.

CUT: the hexagons on the board pages (they touch, one cut serves two), the squares and cards along the printed grid lines, and each A4 board / market page along its dashed middle line (two A5 sheets per page).

WHAT IS WHERE

Page 2: the READY-MADE 4 player board. 33 land tiles, 4 homes, 8 ports, balanced and connected. Cut out the hexagons, put them back where they are printed (coordinates are outside the board). Page 3: 2-3 players, same board with the outer ring set aside; page 4: six spare ports (only for 2-3 players).

Pages 5-6: Bots and Mechs of 4 players, shared buildings, Credit coins, iron, crystal, VP. Page 7: market (Basic side and Advanced side, A5 each). Pages 8-9: 4 commander boards (A5, Advanced side). Pages 10-13: 36 mission cards.

TWO SETTINGS

BASIC: market prices are fixed (iron 3, crystal 4, bot 5, mech 10). A Port opens all four goods (ignore the two goods printed on its tile). The 4 price markers are not used.

ADVANCED: prices start the same but move 1 per item bought or sold (iron 1-6, crystal 2-8, bot 2-10, mech 3-12). A Port opens only the two goods printed on it. You cannot buy and sell the same good in one turn.

SETUP

1. Cut out the board (page 2) and lay it out. Each player takes a commander board, the Bots (20) and Mechs (5) with their mark, and a Dock; their home tile is the one with their mark.

2. On your home tile: 3 Bots, 2 iron, your Dock. Keep your other Bots and Mechs on your commander board. Extractors and Factories are shared: put them in the middle of the table.

3. Market: Basic side up, or Advanced side with the 4 markers on START. Shuffle the mission cards by level (1 VP / 2 VP): draw 10 of each, level 2 under level 1, turn 5 face up. Youngest player starts.

4. 2-3 players: use page 3 instead (outer ring and ports set aside, homes and ports moved as shown).

A TURN (in any order, as often as you can pay)

Start: gain 3 Credits + 1 for each land tile you control; take the coins off the buildings.

Move pieces from a tile you control to a tile you can reach over roads: 1 Credit per step for the whole group, any number of pieces. Iron/crystal only move with a Bot.

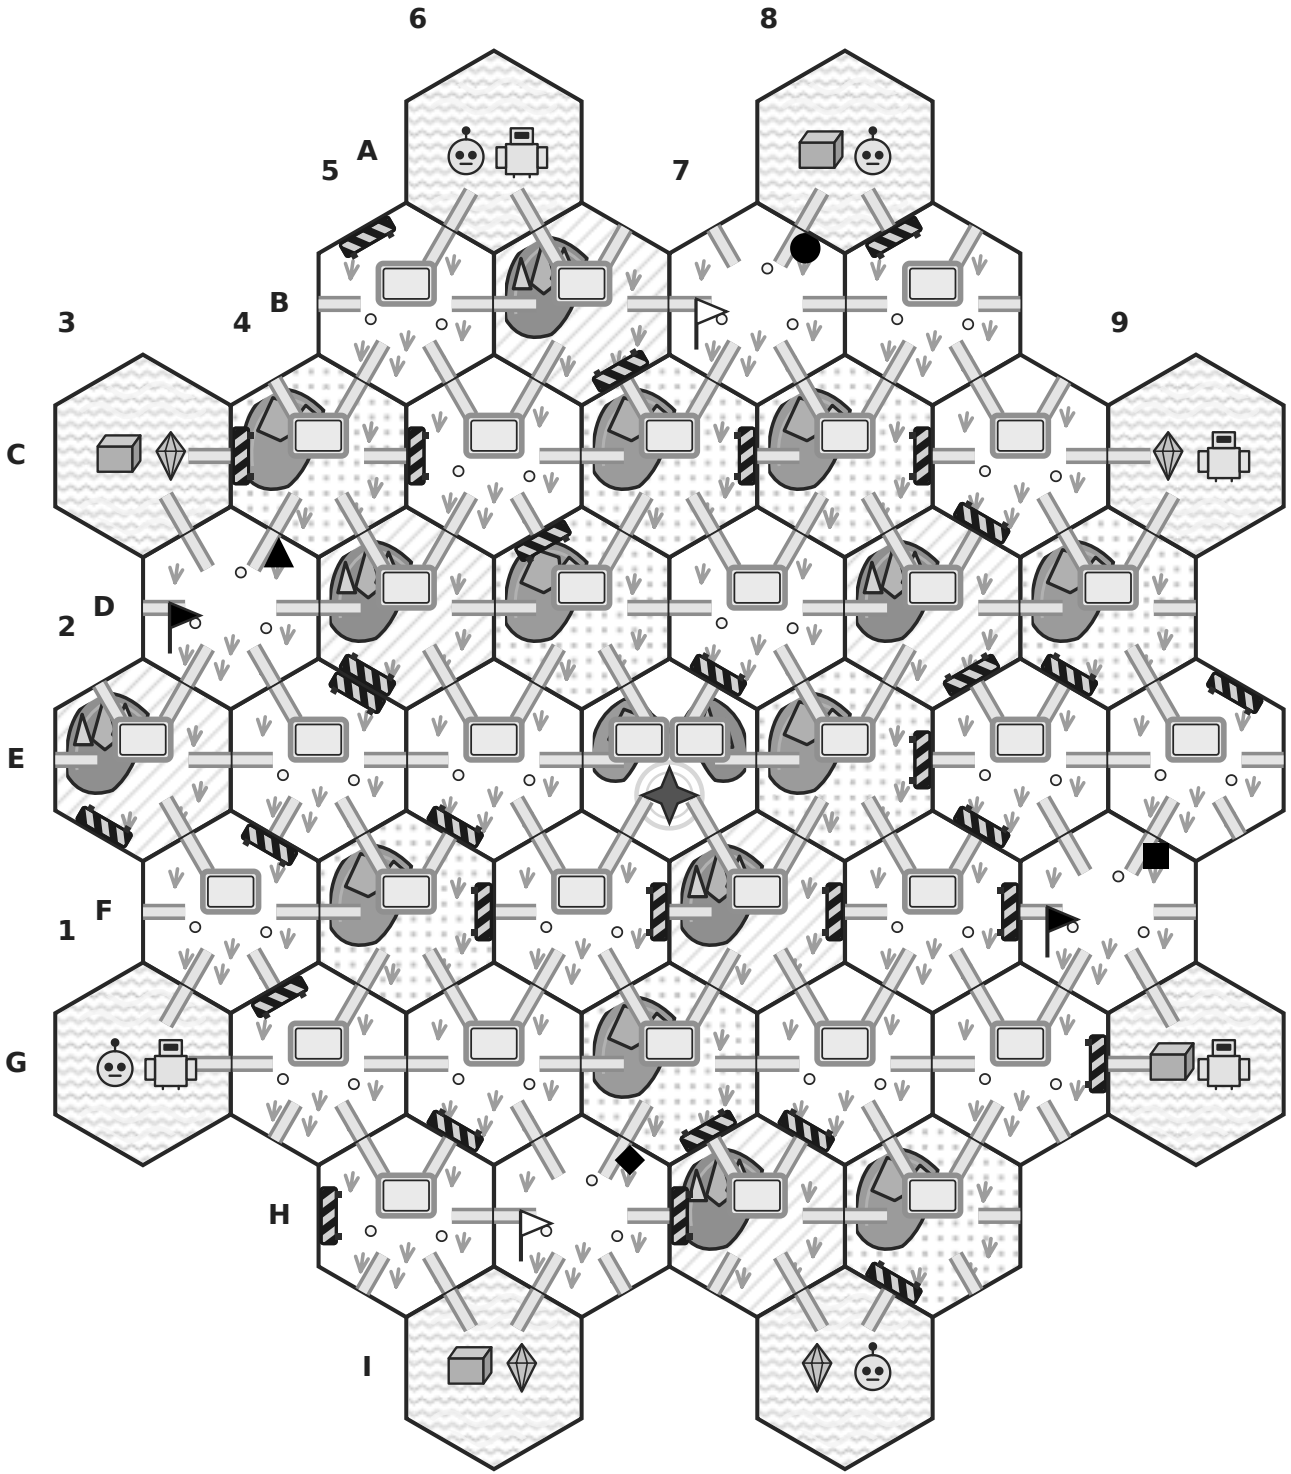
Extractor: 1 Credit once per turn = 1 token of the tile's resource. Factory: 1 Credit once per turn: 1 iron = 2 Bots, or 1 iron + 1 crystal = 1 Mech. These buildings belong to whoever holds the tile.

Build: Extractor = 1 iron, Factory = 2 iron on a free round socket of a tile you control. Trade: at your Dock (iron, bots) or a Port next to a tile you hold, any amount, as often as you like.

Mission: pay 5 Credits (+1 for each you bought earlier) for a face-up card: you score only if you meet it right now. Win with 5 VP.

Fight: moving onto a tile held by someone else attacks it. Bot = power 1, Mech = power 5. 2 x defender power pushes it away, 3 x kills it. Resolved when you end your turn.

You control a tile while one of your pieces stands on it. Full rules: rulebook/rulebook.pdf.



4 PLAYERS

board is ready: cut out
the hexagons, put them back
where they are printed.

▲ home of player 1

● home of player 2

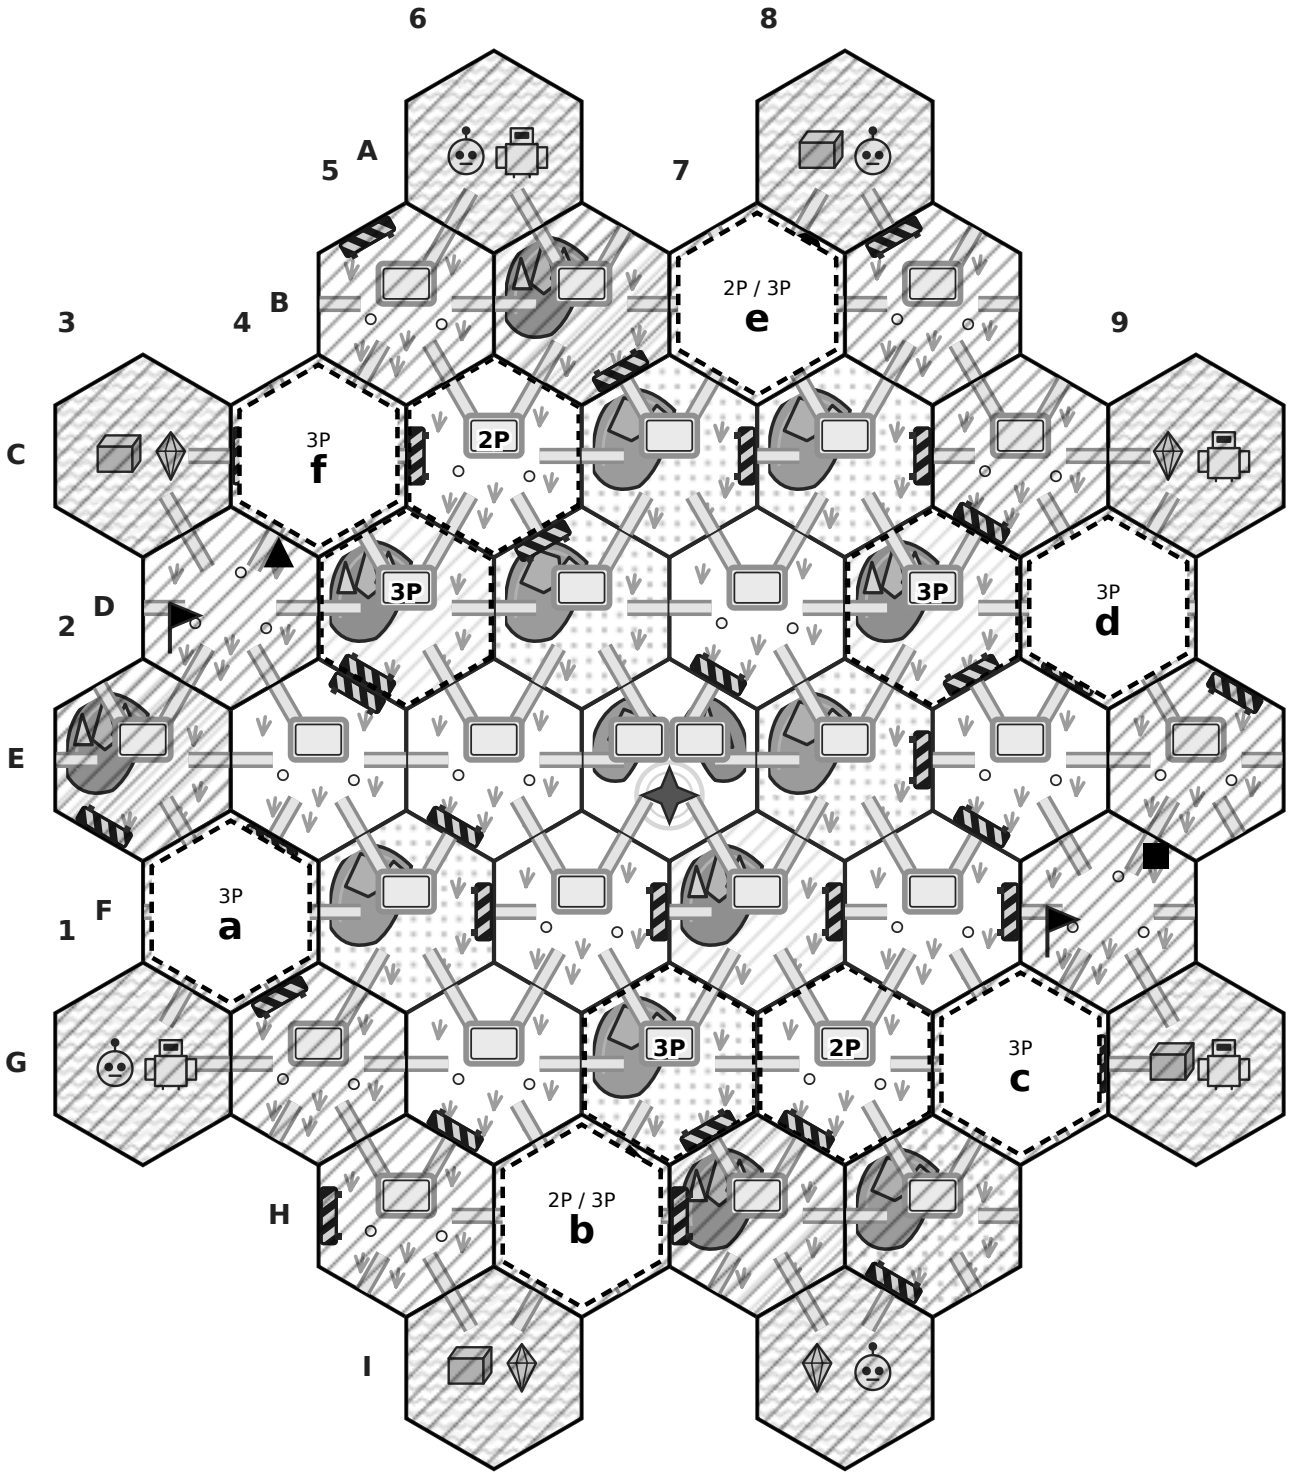
■ home of player 3

◆ home of player 4

Ports show the 2 goods
they open (Advanced).
Basic: a port opens all.

A road runs to every edge
except the hazard-striped one.

2-3 players: next page.



2 OR 3 PLAYERS

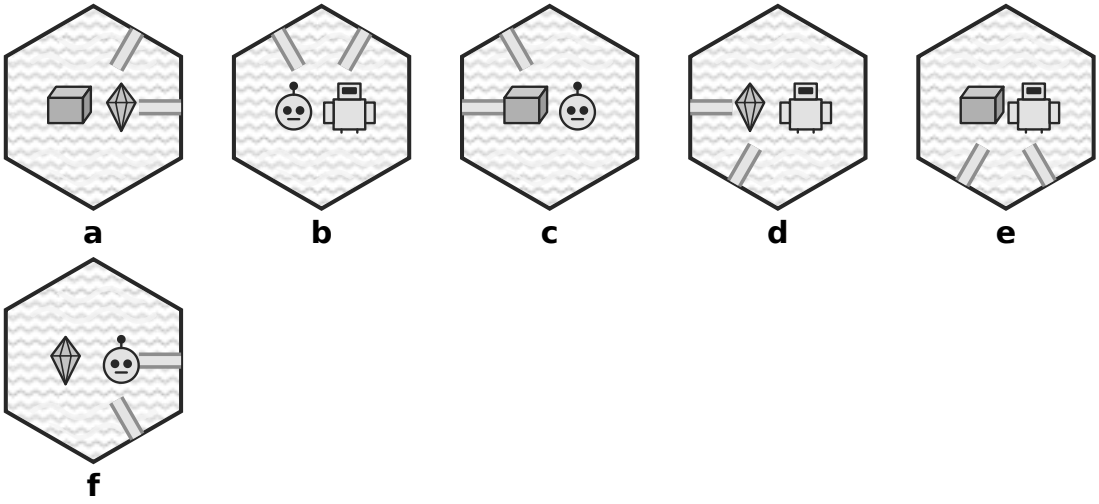
Set aside the hatched hexagons: outer ring, the 4 homes, the 8 ports.

Play on the 19 hexagons inside.

2P / 3P (dashed, with a bold outline): put a home tile on that spot, take its land tile away.
Homes: triangle = player 1, circle = 2, square = 3.

A letter on an empty spot = the spare port with that letter goes there (spare ports: next sheet).
Some spots take the same port in the 2 and the 3 player game.

SPARE PORTS (for 2 or 3 players)

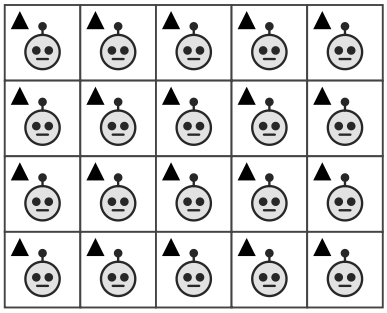


Letters match the dashed spots on page 3 (2P: ... / 3P: ...). Cut the ports out along their outline.

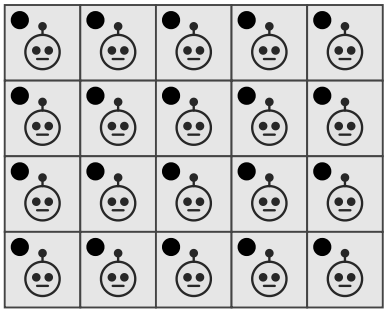
In a 4 player game the spare ports are not used.

LITTLE COMMANDERS - print and play, 4 players - pieces

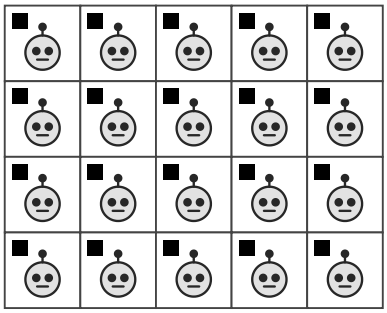
BOTS - player 1 (20) ▲



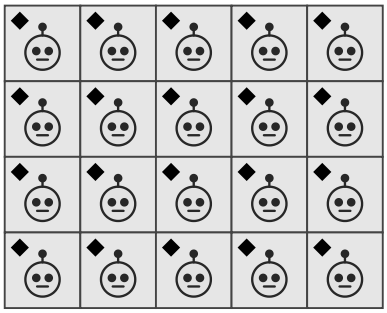
BOTS - player 2 (20) ●



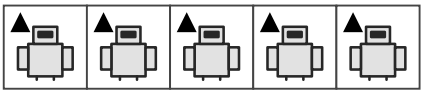
BOTS - player 3 (20) ■



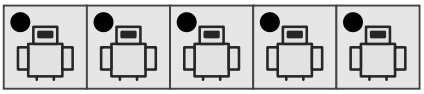
BOTS - player 4 (20) ◆



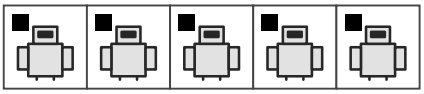
MECHS - player 1 (5) ▲



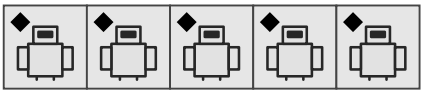
MECHS - player 2 (5) ●



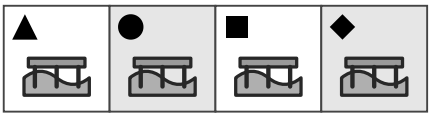
MECHS - player 3 (5) ■



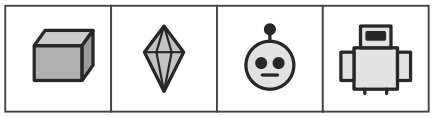
MECHS - player 4 (5) ◆



DOCKS (4, one per home tile)



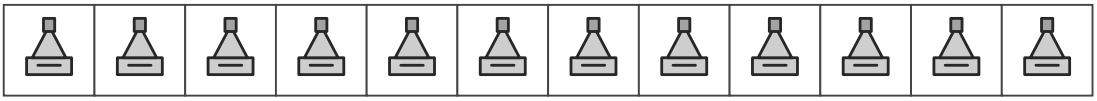
PRICE MARKERS (4, Advanced game)



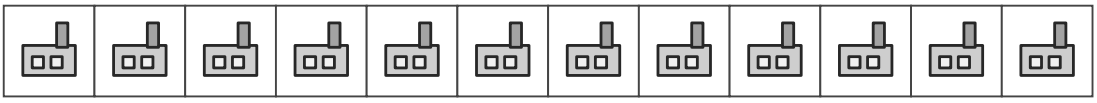
Bots and Mechs stand on the tiles. The Dock goes on your home tile. Your spare Bots and Mechs wait on your commander board (the printed squares are the right size). Marks: player 1 = triangle, 2 = circle (grey), 3 = square, 4 = diamond (grey).

LITTLE COMMANDERS - print and play, 4 players - shared buildings, Credits, resources, VP

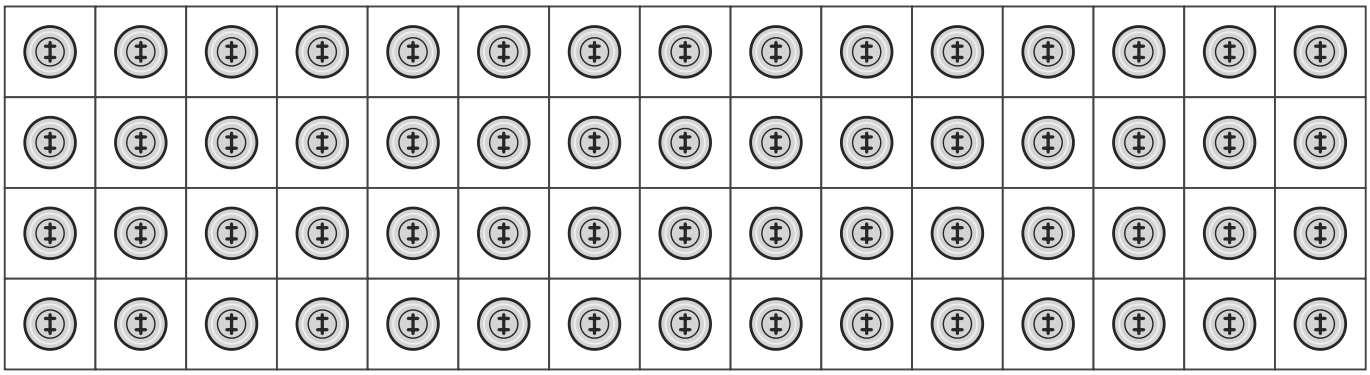
EXTRACTORS (12, shared by everyone)



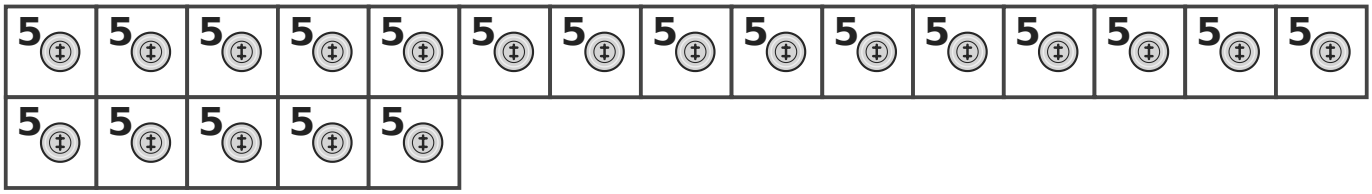
FACTORIES (12, shared by everyone)



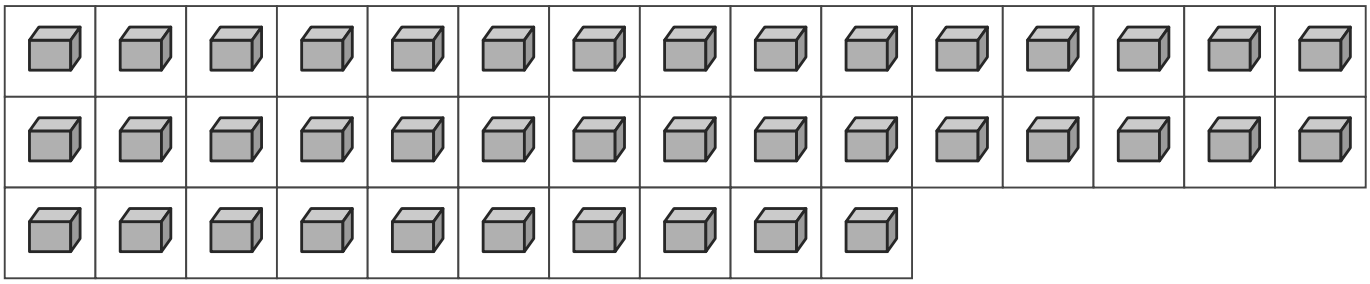
CREDIT COINS 1 (60)



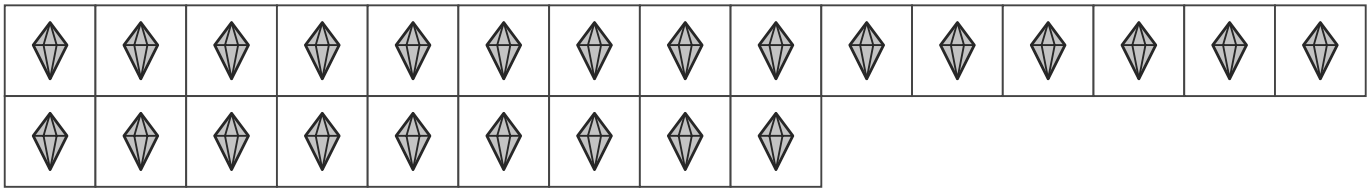
CREDIT COINS 5 (20)



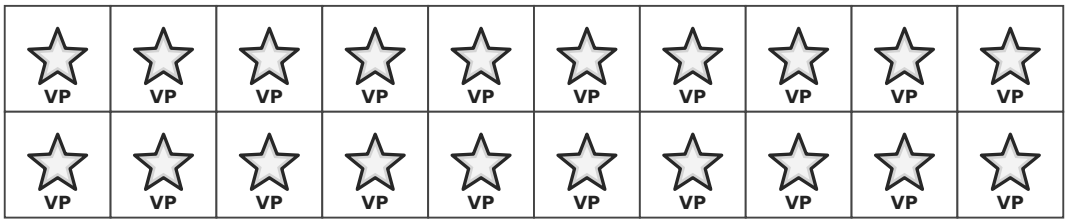
IRON TOKENS (40)



CRYSTAL TOKENS (24)



VICTORY POINTS (20)



Extractors and Factories are not personal: they work for whoever holds the tile they stand on. Put one on a free round socket. A Credit coin on an Extractor or Factory = used this turn; take the coins off at the start of your turn.

THE MARKET - BASIC SIDE (fixed prices)

Buy and sell at your Dock (iron and bots) or at a Port next to a tile you hold: any amount, as often as you like, no fee.

IRON	**3**	Credits, to buy and to sell
CRYSTAL	**4**	Credits, to buy and to sell
BOT	**5**	Credits, to buy and to sell
MECH	**10**	Credits, to buy and to sell

Prices never change: Iron 3, Crystal 4, Bot 5, Mech 10.

A Dock opens iron and bots. A Port opens all four goods (ignore the two printed on it).

Same price to buy and to sell: you earn from Factories and Extractors, not from the market.

THE MARKET - ADVANCED SIDE (prices move)

Buy and sell at your Dock or a Port. Every item bought moves the price up 1, every item sold down 1.

IRON	1	2	**3** START	4	5	6			
CRYSTAL	2	3	**4** START	5	6	7	8		
BOT	2	3	4	**5** START	6	7	8	9	10
MECH	3	4	5	6	7	8	9	**10** START	11	12

Put the 4 price markers on the START squares.

Everything is paid at the CURRENT price; the price moves after the whole trade (1 per item).

You cannot buy and sell the same good in one turn. A Port opens only the 2 goods printed on it.

COMMANDER BOARD - PLAYER 1

ADVANCED SIDE - moving prices, Ports open two goods

Unit Supply

Bots (20 in reserve)

Mechs (5 in reserve)

Buildings are shared

Extractors and Factories are not yours: they work for whoever holds the tile.
Your home Dock trades iron and bots.

Start of your turn

Gain 3 Credits + 1 per land tile you hold.
Take the coins off your buildings (they can work again).

Then, in any order

- Extractor: take 1 token of the tile's resource — **1**
- Factory: 1 iron = 2 Bots, or iron + crystal = 1 Mech — **1**
- Move any pieces together: 1 Credit per step — **1**
  Iron and crystal only travel with a Bot (one at the start and one at the end).
- Trade at your Dock or a Port next to a tile you hold
  Price now: **3 (1-6)** **4 (2-8)** **5 (2-10)** **10 (3-12)**
- Buy a Mission (+1 for each you have bought) — **5**

Each item bought moves its price up 1, each item sold moves it down 1 (stay inside the range).
You cannot buy and sell the same good in one turn. A Port opens only the two goods on it.
A coin on a building = used this turn.

Build (iron on the tile)

x1 **x2**

Fight

power 1 **power 5**
push: 2 x defenders
kill: 3 x defenders
Win: 5 VP, only from Missions
